

DowSyn HB-200

Description :

DowSyn HB-200 is high molecular weight polyisobutene from pure isobutene homopolymers with excellent air tightness, heat resistance, electrical insulation, ozone aging resistance. Between its protective barrier and adhesive properties, they can be widely used in sealant, adhesive, shock absorption and damping, insulating materials and other industries.

Typical performance :

Item	Unit	Spec	Typical
Appearance		Off-white Gray rubber block	Pass
Staudinger Index	cm ³ /g	350-500	487
Viscosity Average Molecular Weight	Mv*10 ⁴	175-303	292
Weight Average Molecular Weight	Mw*10 ⁴	190-270	257
Volatiles	wt%	≤0.30	0.12
Total Ash	wt%	≤0.04	0.02

Typical Properties are obtained with normal production and do not constitute as specification.

Application :

Adhesive: Combination with the medium-molecular-weight PIB or with natural rubber for the production of adhesives for pressure-sensitive products.

Building industry: For sealing membranes used to seal buildings from standing water

Rubber Industry Electrical industry Inorganic filler Mixtures with Waxes and Bitumen

Storage Life & Conditions

Three years from production date. Store below 35°C. Prevent exposure to sunlight.
